## Objective and Investment Policy

### Objective

The investment objective of the Fund is to provide long-term (5 – 10 years) growth through a combination of capital and income.

### Investment Policy

The Fund will adopt a global investment approach, unconstrained by a formal benchmark, with a diversified exposure to a range of asset classes including equities (both UK and global); government and public securities, investment grade corporate bonds (corporate loans that pay interest), deposits, cash and near cash (to provide liquidity), alternative assets and other fixed interest investments.

The Fund will invest primarily (at least 70%) in collective investment vehicles (for example open-ended investment companies, unit trusts, exchange traded products, investment trusts). Typically no more than 75% will be exposed to equities, with the standard weighting being 55-75%.

Through these investments, the Fund may also obtain indirect exposure to alternative assets, including property, infrastructure, private equity and gold. The Fund may also invest directly in the asset classes listed above with the exception of alternative assets.

### Other features of the Fund:

The Fund is actively managed. The Investment Manager uses its expertise to select investments for the Fund and has the discretion to invest without the need to adhere to a particular benchmark.

The Fund can invest in other funds (including those managed by the Manager, the Investment Manager and its associates).

The Fund can invest across different geographic areas and industry sectors without limitation.

You can buy and sell units in the Fund on each business day.

The Fund aims to distribute available income every six months. The level of income is not guaranteed and may fluctuate.

The Fund has the power to invest in derivatives (investments whose value is linked to another investment, such as performance of a stock exchange or an exchange rate) to reduce risk or cost or to generate additional capital or income at proportionate risk (efficient portfolio management) but it is not anticipated that this power will be utilised at the current time.

Recommendation: This Fund may not be suitable for investors who plan to withdraw their money within 5 years. More information on the management of this portfolio can be found at [www.waystone.com](http://www.waystone.com).

## Risk and Reward Profile

This indicator shows how much the Fund has risen and fallen in the past, and therefore how much the Fund's returns have varied. It is a measure of the Fund's volatility.

The higher a Fund's past volatility, the higher its position on the scale and the greater the risk that investors may have experienced losses as well as gains.

The Fund has been classed as 4 because its volatility has been measured as average.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward profile shown is not guaranteed to remain the same and may change over time.

The lowest number on the scale does not mean that the Fund is risk-free. The value and income from the Fund's assets may go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the Fund will achieve its objective and you may get back less than you originally invested.

- The movements of exchange rates may lead to further changes in the value of investments and the income from them.
- There is a risk that any company providing services such as safe keeping of assets may become insolvent, which may cause losses to the Fund.

For more information about the Fund's risks, please see the Risk Factors section of the prospectus which is available at [www.waystone.com](http://www.waystone.com).
